Organization Description

Trusted Topeka providers, Family Service & Guidance Center and Valeo Behavioral Health Care, have brought together decades of experience and are now one organization: Astra Mental Health & Recovery. Astra is a 501c(3) non-profit certified community behavioral health clinic in Topeka that provides whole-person care, meeting individuals where they are and helping them take the next step toward wellness. Astra is the primary provider of mental health and substance use recovery services in Shawnee County for anyone who needs it – regardless of their age, where they live or their ability to pay.

Project Title

Comprehensive Care for Individuals Living with Opioid Use Disorders

Project Summary

This project will provide a system for comprehensive care for those who have an opioid use diagnosis and would benefit from participating in a medication-assisted program. The project will focus on evaluation for medications for opioid use disorders (MOUD), the medication needed, the follow-up visits with the APRN, treatment, assistance with housing if needed and step-down treatment after inpatient.

Populations Served

Populations:	Adults, At-Risk Individuals, Families, General - Behavioral, Homeless, Individuals in Recovery, Individuals on MAT, Individuals with SUD, Justice Involved Individuals, Parents, Seniors, SPMI - Severe & Persistent Mentally Ill, Veterans, Youth
County:	Shawnee

Crawford County Mental Health Center

Organization Type: Governmental agency

Congressional District(s) Served:

2 & 4

Award Amount: \$1,000,000.00

Estimated Number Served	Estimated MOUD Number Served
1200	400

Organization Description

CCMHC has been serving the mental health needs of Crawford County, Kansas since 1961. CCMHC provides a wide range of mental health services that have a demonstrated need in the community, giving priority to those services which are not or cannot be provided at an affordable rate by other sectors of the surrounding areas, without regard to race, age, creed, color, national origin, gender, sexual orientation, or economic status. CCMHC strives to empower all individuals and families to receive mental health and addiction treatment services so that they may sustain life in the least restrictive environment and live life to their fullest potential. CCMHC serves all residents of Crawford County, Kansas and surrounding areas, regardless of ability to pay and according to a sliding fee scale.

Project Title

Recovery Access and Engagement Center (RAEC)

Project Summary

Crawford County Mental Health Center (CCMHC) proposes the development of the Recovery Access and Engagement Center (RAEC), a 24-hour, low-threshold recovery hub designed to provide rapid access to substance use disorder treatment, recovery support services, and behavioral healthcare for individuals throughout Southeast Kansas. The center will offer walk-in screening and assessment, peer recovery support, overdose prevention education, naloxone distribution, care coordination, and rapid linkage to Medication for Opioid Use Disorder (MOUD) and Medication for Alcohol Use Disorder (MAUD).

Populations Served

Populations:	Adults, At-Risk Individuals, Consumers, Families, General - Behavioral, General Public, Homeless, Immigrants, Individuals on MAT, Individuals with SUD, Justice Involved Individuals, Parents, Postpartum Women, Pregnant Women, Rural, Seniors, SPMI - Severe & Persistent Mentally Ill, Student (University), Uninsured/Underinsured, Veterans

Organization Description

United Methodist Mexican American Ministries, which later became Genesis Family Health (GFH), was established in 1974 by members of the Southwest Kansas United Methodist Churches and the District Superintendent. They recognized that immigrant, migrant, and refugee populations in southwest Kansas faced numerous disparities and barriers and were often disadvantaged because they did not speak English and did not understand navigating the American medical, education, justice, and social systems. Genesis Family Health provides services to all regardless of their ability to pay - GFH provides over \$4M annually in charitable care and sliding fee discounts across southwest Kansas communities. Genesis Family Health provides comprehensive, coordinated, high-quality primary and preventative care, including medical care, preventative and extensive dental, behavioral health services, substance abuse/MAT, Ryan White case management, chronic care/education, and social services to people of all ages throughout the southwest Kansas region. With clinics located in Garden City, Dodge City, Liberal, and Ulysses, the organization serves patients across 15 zip codes and throughout 10 rural communities. GFH is a faith-based ministry strengthening communities by providing health and wellness services through over 40,000 visits annually.

Project Title

MOUD Momentum - Building the SW Kansas Recovery Corridor

Project Summary

Genesis Family Health (GFH) proposes a 24-month programmatic implementation to expand access to Medication for Opioid Use Disorder (MOUD), Medication-Assisted Treatment (MAT), and Substance Use Disorder (SUD) prevention services across four underserved rural counties in southwest Kansas: Grant, Ford, Seward, and Finney. Project activities include universal SUD screening, rapid-access MOUD induction, integrated counseling, multi-lingual outreach, youth prevention education, and coordinated referrals with hospitals, schools, law enforcement, and community organizations.

Populations Served

Counties:	Finney, Ford, Grant, Seward

Kansas Pharmacists Association

Organization Type: 501c(6)

Congressional District(s) Served:

All

Award Amount:

\$388,010.00

Estimated Number Served	Estimated MOUD Number Served
150	25

Organization Description

The Kansas Pharmacists Association (KPhA) represents all pharmacists, pharmacy technicians, and pharmacy students in the state of Kansas with the vision of promoting quality public health and patient care through pharmacy services. KPhA has a strong history of providing education, training, and advocacy to help pharmacy professionals care for their communities. Our membership covers all pharmacy practice settings in the state, from inpatient health systems urban and rural to community pharmacies located in 103 of 105 Kansas counties.

Project Title

Filling the Gap: Building Kansas Pharmacist MOUD Infrastructure

Project Summary

With the passage of House Bill 2068 in 2026, Kansas pharmacists gained the authority to independently initiate medications for opioid use disorder (MOUD), but the administrative, billing, and practice infrastructure needed to activate this new provider type does not yet exist. The Kansas Pharmacists Association (KPhA) will use this two-year grant to begin building that infrastructure through four focus areas: developing state agency relationships and reimbursement pathways required to support pharmacist-provided MOUD, engaging national partners and peer states to adapt proven models to Kansas, supporting at least one pilot pharmacy to begin providing MOUD services, and developing a Kansas-specific toolkit and educational programming to drive broader participation beyond the grant period. With community pharmacies operating in 103 of 105 Kansas counties, including rural and frontier communities where treatment access is most limited, pharmacists represent an untapped and uniquely accessible provider workforce for MOUD. This project lays the foundation for pharmacist-provided MOUD to become a sustainable component of Kansas's substance use disorder treatment system.

Organization Description

Prairie View is a nonprofit Certified Community Behavioral Health Clinic (CCBHC) providing comprehensive mental health, substance use disorder, crisis, and recovery support services throughout south-central Kansas. Founded in 1954, Prairie View serves residents of Harvey, Marion, and McPherson counties through a continuum of care that includes outpatient treatment, psychiatric services, crisis intervention, mobile crisis response, peer support, school-based services, and substance use disorder treatment. In 2025, Prairie View provided more than 147,000 services to over 6,000 individuals, reflecting its longstanding role as the region's primary behavioral health provider. Through a commitment to accessible, integrated, and evidence-based care, Prairie View works to improve the health and well-being of individuals, families, and communities across its predominantly rural service area.

Project Title

Prairie View Mobile MOUD Program

Project Summary

Prairie View proposes to expand access to Medications for Opioid Use Disorder (MOUD) through the implementation of an Integrated Mobile Behavioral Health and Primary Care Access Unit serving Harvey, Marion, and McPherson counties. The project will provide low-threshold, community-based access to MOUD, behavioral health services, peer support, care coordination, telehealth, overdose prevention education, and recovery support for individuals experiencing opioid use disorder and co-occurring conditions. By bringing services directly into rural and underserved communities, the project will reduce barriers related to transportation, provider shortages, stigma, and fragmented systems of care.

Populations Served

Populations:	Adults, At-Risk Individuals, Consumers, General - Behavioral, General - Medical, Individuals on MAT, Individuals with SUD, Justice Involved Individuals, Rural, Uninsured/Underinsured
Counties:	Harvey, Marion, McPherson

Estimated Number Served	Estimated MOUD Number Served

Organization Description

SACK has been laying the groundwork to become an Opioid Treatment Provider (OTP) for the last year. We currently have medical staff prescribing Suboxone to clients on an outpatient basis. We also have management staff working on securing the necessary licensing/certifications. We have received our letter of intent for certification through CARF, turned in our application to the Kansas Board of Pharmacy, and are currently working on SAMHSA, DEA, and KDADS applications. Additionally, we have been working with contractors to determine construction/remodel needs on our current facilities to meet licensure requirements.

Project Title

OTP and Satellite Units

Project Summary

This particular project is designed around two phases. In Phase 1, SACK will become a licensed Opioid Treatment Program (OTP) in Wichita, with primary emphasis on providing full MOUD services to individuals that would not otherwise have the financial means to access these services. Phase 2 would include opening satellite units in rural areas of Kansas that do not currently have an OTP within a reasonable distance to them.

Populations Served

Populations:	Adults, At-Risk Individuals, Consumers, General Public, Homeless, Individuals on MAT, Justice Involved Individuals, Postpartum Women, Pregnant Women, Rural, SPMI - Severe & Persistent Mentally Ill, Uninsured/Underinsured, Urban
Counties:	Ellis, Ford, Sedgwick

Organization Description

The University of Kansas Hospital Authority, d.b.a. The University of Kansas Health System (health system) is a world-class academic medical center offering a full range of services. The health system includes eight hospitals and 140+ clinic locations, with more than 1,500 practicing physicians caring for approximately 25,000 inpatients and 550,000 outpatients each year, who travel from every county in Kansas, 98% of Missouri counties, all 50 states, and 26 countries.

Project Title

No Wrong Door: Integrated Access to MOUD Across Care Settings

Project Summary

No Wrong Door: Integrated Access to MOUD Across Care Settings builds on existing clinical infrastructure to expand access to MOUD through four integrated strategies: (1) increased treatment capacity within the Addictions Treatment Program for uninsured and underinsured patients, (2) implementation of a clinical addictions navigator position to support engagement, linkage to outpatient MOUD, and retention to care, (3) a prevention and harm reduction program that provides harm reduction tools and education, and (4) no wrong door access through expanded partnerships and referral pathways. Services will be delivered across inpatient, outpatient, and community settings to create a seamless continuum of care that reduces gaps between identification and treatment.

Populations Served

Populations:	Adults, At-Risk Individuals, Caregivers, Families, General Public, Individuals in Recovery, Individuals on MAT, Individuals with SUD, Postpartum Women, Pregnant Women, Seniors, Uninsured/Underinsured
Counties:	Douglas, Johnson, Leavenworth, Shawnee, Wyandotte
